

is seeking an

## **INDUSTRIAL HYGIENIST**

A career opportunity currently exists at the Canadian Fertilizers Limited facility in Medicine Hat.

Reporting to the Supervisor – Safety Services, the Industrial Hygienist is responsible for the development and maintenance of programs designed to control occupational health hazards. The Industrial Hygienist provides support and training on key program components for all levels of the organization and facilitates the development of all Department specific industrial hygiene operating and reference materials. In addition to the tasks associated with the Industrial Hygiene component of the EHS program, the Industrial Hygienist also supports all other facility EHS initiatives, and ensures management is made aware of any regulatory revisions that may impact site regulatory compliance.

The Industrial Hygienist will have completed post secondary education in Industrial Hygiene or a directly related field, and be in possession of or pursuing accreditation as a ROH/CIH or ROHT. Consideration will be given to individuals with a post secondary education in a science discipline with experience (preferably related to EHS) in an industrial setting. The Industrial Hygienist must have demonstrated skills in planning, organizing and leading training seminars in addition to developing concise procedures and reports. Strong interpersonal and communication skills along with time managements skills will contribute to the success of the individual in this role.

The successful candidate will have completed post secondary education in Industrial Hygiene or a directly related field, and be in possession of or pursuing accreditation as a ROH/CIH or ROHT. Consideration would be given to individuals with a post secondary education in a science discipline with experience (preferably related to EHS) in an industrial setting. A combination of formal instruction and on-site training to develop the skills of the Industrial Hygienist in Training will be provided for the right candidate.

Canadian Fertilizers Limited is a major manufacturer of nitrogen fertilizers for North American agriculture. The Company and its employees are committed to Environment, Health and Safety principles to ensure the protection of workers, the surrounding community, and the environment.
