

Graduate Hygienist

Health and Safety

Reporting to the Team Leader of Health and Hygiene, the incumbent will be developed, coached and mentored through effective on the job technical, supervisory and leadership development training. This program occurs over a three year period in order to meet critical operational requirements at EKATI and globally.

The successful graduate will be an analytical thinker, who is action oriented and has excellent organizational and communication skills. Being able work well with others while delivering results and meeting customer expectations are essential.

This position will focus on identifying, evaluating and controlling occupational exposures at EKATI by applying leading occupational hygiene practices. Delivering educational presentations on occupational diseases, conducting statistical analysis of occupational exposure data and maintaining occupational hygiene databases such as GASP, Medgate and a WHMIS database are some of the other duties of this position.

Applicants are required to have a Degree in Occupational Hygiene and be a recent graduate. Ability to use Microsoft Office products and occupational hygiene statistical packages are essential for this position.

The EKATI Diamond Mine is located 300 kilometers northeast of Yellowknife and is accessible only by plane. The hours of employment are to be determined.
